Curved glass technology coupled with the ability to shape profiles and other materials to create radiussed walls and doors. Whether dictated by a building shape or a desire to introduce a specific effect, a curved partition can complement the standard linear arrangements helping to achieve an overall integrated design effect. A minimum radius of 600mm provides freedom to the designer in creating fluid aesthetics in the same visual language as the partition.

先进的玻璃造型工艺结合铝型材精准弯曲技术，使弧线形的隔断和门成为可能。无论出于与建筑物外形的契合需要，还是设计观念上的别出心裁，柔美的弧形线条突破传统的直线造型，成为现代室内空间设计的常用因素。E100最小可达600毫米的隔断圆弧半径，为设计师带来尽情发挥灵感的自由。
